

SYMPOSIUM

Negative pressure wound therapy: Contemporary views on mechanisms of action

Date:
May 1st,
16:00–17:00 GMT

Room:
South Gallery
11–12, Level 1

Synopsis:

In this session, hosted by Mölnlycke Health Care, we will look at negative pressure wound therapy mode of action. We will challenge some of the misconceptions and introduce new research and clinical examples demonstrating how different dressing formats illicit a different healing response, which if understood and applied appropriately, could lead to more clinically and economically effective use of different forms of negative pressure systems and dressings. The speakers will also share their clinical experience of using a canister-based, single-use NPWT system.

Moderator:

John Timmons

- Corporate Medical Director
- Former Clinical Nurse Specialist in Tissue Viability
- Lecturer in Post Grad. Nursing

Speakers:

Dr Marino Ciliberti
MD

- Plastic surgeon
- Director of the Wound Care Centre, Napoli, Italy
