Hands .....	½ measure twice a day
Genitals .....	½ measure twice a day

Children under ten years of age require half the above amounts

1 measure (4g Epaderm Cream)

### How Epaderm® works

Epaderm® Cream is an emollient formulated with clinically proven ingredients that can be used on the skin or as a skin cleanser.

In a recent study, over 85% of health care professionals noticed an improvement of the dry skin and nearly 85% of patients had an improvement in the skin softness after four weeks of Epaderm Cream use<sup>1</sup>.

By providing a film barrier, Epaderm Cream aids moisture retention within the skin. This product relieves dry skin symptoms by improving rough and scaly, dry skin<sup>1</sup>.

Emollients are particularly helpful for people with dry skin, which is often the cause of widespread itch; they are especially effective if applied immediately after washing or swimming<sup>2</sup>. Emollients can help to reduce the risk of skin tears<sup>3</sup>.

### Benefits of Epaderm Cream

- Recommended by doctors\*
- 97% who tried Epaderm® Cream in a survey recommended it<sup>1</sup>
- Moisturises and softens the skin
- Improves skin hydration in as early as two weeks
